General information:

Founded in 2003, **Everling Építő-, Termelő és Szolgáltató Kft.** is a Hungarian small business, the legal successor of private enterprise having been operated since 1994.

Our motto: Whoever has a garden, he sees nature opening up from the doorstep.

Initially, we were involved in the cultivation of ornamental plants, the building and maintenance of private gardens, as well as the distribution of gardening products, and then in 1999 opened our first nursery garden in District XVI of Budapest. In recent years, we have participated in large construction projects, and thus today we can state that due to our high-standard services our company belongs to those businesses that offer highly esteemed garden and park development, as well as construction services.

We are proud of the fact that our clients, customers have trusted in our expertise and the quality of our work for years. Our young, dynamic team is open to any demand, and strives for offering creative solutions to all our customers both in response to conventional needs and modern requirements.

Since 10 August 2006, our company has been operating a certified ISO 9001:2001 quality management system. An important aspect of our activities is environmentally conscious thinking and the protection of the environment, and therefore at our Company 2007 saw the start-up of the establishment of ISO 14001 environmental management system. With the continuous development of the introduced and efficiently operated quality management system, as well as the adoption of the environmental management system, we intend to ensure the high standards of the implementation activities performed by our Company.
